PROFESSIONAL SUMMARY

Cross-disciplinary Product Designer with formal training in both User Experience (UX) design and full-stack software engineering. Combines structured layout logic with a unique 4-year background orchestrating independent international visual productions. Exceptional at converting complex user anxiety into low-friction digital interfaces, managing high-pressure project ambiguity, and collaborating seamlessly with development teams to ensure technical execution.

CORE SKILLS

- **Product Design:** Interaction Design, Wireframing, Rapid Prototyping, Visual Hierarchy, Information Architecture, User Flows, Storyboarding.
- **Research & Strategy:** User Interviews, Usability Testing, Competitor Analysis, Information Synthesis, Product Scoping.
- **Technical Literacy:** Front-End Architecture Logic, Figma, Usability Hub, Mimo Ecosystem.

PRODUCT DESIGN & ENGINEERING PROJECTS

Solo Product Designer — *Split/R (5-Day Design Sprint)* | 2026

- Designed and prototyped a mobile bill-splitting app from scratch in a 5-day solo sprint, focusing on zero-friction and single-device workflows.
- Interviewed 5 casual diners across different income tiers to uncover hidden social anxieties and user pain points surrounding shared restaurant bills.
- Made the strategic product decision to narrow project scope to convenience and fairness rather than addressing complex user liquidity constraints.
- Validated the final interactive Figma prototype via usability tests, achieving a 100% completion rate with an average task speed of under 45 seconds.

End-to-End UX Designer — *Miracle Morning App* | 2020 & 2026 Evolution

- Designed an 8-screen focused mobile habit tracker to help recent college graduates build consistent, low-friction morning routines.
- Interviewed target users from online communities to identify how mental fog and perfectionism directly cause morning routine abandonment.
- Recognized early phase scope creep (over 40 disjointed feature screens) and ruthlessly simplified the product hub down to 8 high-value screens.
- Utilized AI tools as an interactive design partner to rapidly brainstorm, refine layouts, and establish a clean, dark-room friendly visual system.

UX/UI Designer — *Charitable (Case Study)* | 2020 & 2026 Refresh

- Collaborated in a 4-person team to pivot a restaurant donation concept into a remote individual charity app overnight during COVID-19 lockdowns.
- Designed feature verification badges and direct impact breakdowns (e.g., "\$25 = 75 meals") to successfully address the core user barrier of trust.
- Conducted remote usability tests with 3 users, identifying and removing friction blocks in a cluttered onboarding experience.
- Revisited the project in 2026 with a complete visual and structural overhaul, moving from an aggressive coral palette to a professional trust-building green.

ADDITIONAL EXPERIENCE — PROJECT MANAGEMENT & STORYTELLING

Director & Executive Producer — *Independent Portfolio Productions* | 2021 – 2025

- Independently structured, budgeted, and executed 4 narrative music video productions, managing casting, talent coordination, and solo multi-state and international travel logistics.
- Translated high-level emotional themes into objective, frame-by-frame visual storyboards, directly mapping onto interactive product user flows and visual pacing.
- Oversaw end-to-end post-production workflows including timeline editing, visual effects (VFX) compositing, and technical asset organization under self-imposed shipping deadlines.
- Managed creative ambiguity and iterative feedback loops to shape authentic stories centered on human resilience and empathy.

EDUCATION & CERTIFICATIONS

UX Design Immersive (6-Month Cohort) — Kenzie Academy | 2019

- Formal training in user research, wireframing, interactive prototyping, and cross-functional design handoffs.

Software Engineering Track (6-Month Cohort) — Kenzie Academy | 2020

- Completed comprehensive technical training alongside UX cohort, mastering front-end structural logic and code feasibility under remote constraints.

Software Engineering Technology Certificate — Mimo Certification | 2021

- Certified in programming fundamentals, logic systems, and responsive layout styling.
